Summary

A full time software engineer with experience in building chatbots for various ITSM usecases. Proficient in writing automation scripts and full stack web applications as per client requirements.

I leverage ChatGPT in my day-to-day activities. Recently built a tool that generates end-to-end regression reports using specialized GPT prompts for the business folks to use.

Here's a representation of what I like and do - https://ritvikpuranik.github.io/resume/
